The excellent teaching faculty and facilities provide a superior learning experience to the students. On behalf of entire chhatrapati shivaji maharaj college of nursing. I wish you good luck for your future

- DR. KESHAV BADAYA

Principal Message

Nursing is one of the most honorable and a respectable profession in modern health care but is also one of the most challenging. Yes it's not easy being a good nurse. To be great nurse, you must not only have to be very well qualified professionally but also have the right positive attitude. There is ample of opportunities for you to grow and to be an independent individual. To day, there is tremendous demand for quality nursing not only in India but all over the world. become a nurse and extend your services in the development of healthy nation. wishing you a very bright future. God Bless you.

- MR. ZUBER AHMED SANADI

About us

Chhatrapati Shivaji Maharaj College of Nursing (CSMCN) provide invaluable education to aspiring nurses in order to become reliable members of the healthcare system and to effectively bridge the gap in the appalling nurse-patient ratio. The visionaries behind CSMCN believe that it is their responsibility to create a learning environment that enables students to achieve self-directed learning and develop a lifelong learning attitude.

With modern infrastructure, state of-the-art facilities and experienced faculties, CSMCN aims to foster a sense of confidence along with much needed clinical skills, supported by a strong foundation of theoretical knowledge, in its students in order to make them invaluable members of the healthcare industry

Vision

Our vision is to provide specialized & tertiary level of health care & boost highly qualified & dedicated team of nursing practitioners & other health personnel. The nurse practitioners with other health workers is committed to provide not only quality medical care but also aim to make a healthy atmosphere for the patient to stay & experience quality nursing care in a holistic manner.

Mission

Our mission is to make quality nurses & to improve nursing care we are committed to the nursing profession, achievement & maintenance of excellence in education, research & development for the sake of humanity. Armed with the best of facilities in the area of education, research & patient care with highly qualified professionals, we are going to make efficient future nurses.

Teaching Methodology

Teaching methodology has been designed to inculcate conceptual and technical skills in students and is based on lectures, demonstrations, seminars, group discussions, practical training on patients etc. Efforts have been made to impart education and training through a methodology consisting of -

TEACHING AIDS

Modern scientific teaching is practically impossible without a gamut of teaching aids viz. overhead projectors (OHP), slide projector, LCD projectors, computer and internet, power point presentations etc. Our faculty utilizes these facilities liberally.

LECTURES

Didactic lectures are delivered by experienced faculty to give an overview of different organ systems.

LABORATORY DEMONSTRATION

These are held in the respective labs according to prescribed syllabus to develop psychomotor skills, ability to observe, verify and to reach on logical conclusions.

CLINICAL DEMONSTRATION

Clinical Demonstrations are given with an objective to develop technical skills in the students and to illustrate how to perform an act procedurally.

CLINICAL TEACHING

Students are sent to the various wards and departments for developing better skills and have a direct interface with the patients which enables them to improve their nursing care, techniques and skills.

TEACHING THROUGH SIMULATORS

Skill development lab has been developed considering the need for teaching through simulators. Here the trainer exposes the students for conducting specialised procedures on live like simulators before practicing on patients. A demonstration of various organs, nerves & senses given to the students through sophisticated software fitted mannequins.

GROUP DISCUSSIONS

These are held periodically in batches of 6-10 students, supervised by a faculty facilitator for clarifying doubts, sharing knowledge with fellow colleagues and teachers.

PANEL DISCUSSION

This training programme helps the students to be confident and gain the update knowledge. It provides a broad platform to the students to nurture their talent.

FIELD TRIP

These are organized to give the students training in natural environment by making them visit special departments, units in the hospital, outside agencies and community services.

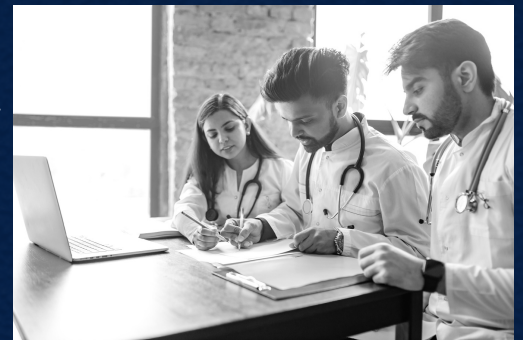

Career Prospectus After B.Sc (N)

After completing B.Sc. Nursing in India, you have various job opportunities in the healthcare sector. Some of the common job options for B.Sc. Nursing graduates in India include:

- **Staff Nurse:** As a staff nurse, you will work in hospitals, nursing homes, clinics, and other healthcare settings, providing direct patient care, administering medications, assisting in procedures, and monitoring patients' conditions.
- **Government Hospitals and Institutions:** Many B.Sc. Nursing graduates opt to work in government hospitals and institutions at various levels of healthcare, including primary health centers, community health centers, and district hospitals.
- **Private Hospitals and Nursing Homes:** Private hospitals and nursing homes are another major employer of B.Sc. Nursing graduates in India. These facilities offer a range of job opportunities in different departments and specialties.

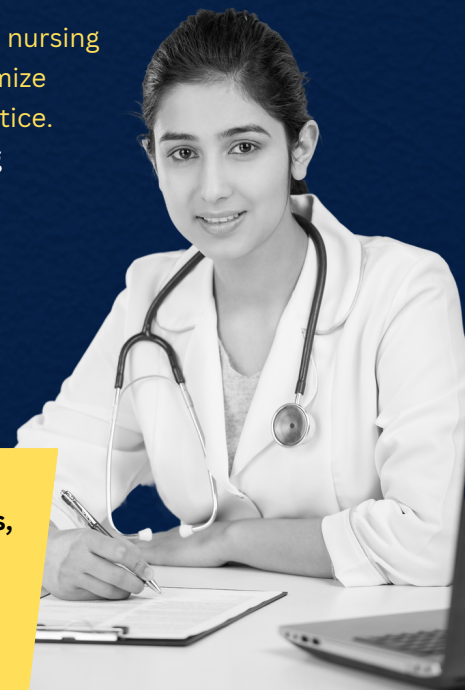

- **Community Health Centers:** You can work in community health centers that focus on providing healthcare services to rural and underserved areas. This role involves health promotion, disease prevention, and community outreach.
- **Home Healthcare Services:** Some B.Sc. Nursing graduates work with home healthcare agencies, providing nursing care to patients in their homes. This could involve caring for elderly individuals, post-operative patients, or those with chronic illnesses.
- **Academic Institutions:** If you have an interest in teaching, you can pursue a career as a nursing educator in academic institutions that offer nursing courses. Further studies and experience may be required for this role.

- **Research Organizations:** B.Sc. Nursing graduates can also work in research organizations that focus on healthcare research and clinical trials. This role involves assisting in research projects and contributing to evidence-based practices.
- **Nursing Informatics Specialist:** With the increasing use of technology in healthcare, nursing informatics specialists are in demand. They manage electronic health records, optimize healthcare technology, and enhance the use of information systems in nursing practice.
- **Military Nursing:** The Indian Armed Forces also have opportunities for B.Sc. Nursing graduates to serve as commissioned officers in their nursing services.
- **Industrial Occupational Health Nurse:** Some companies employ nurses to manage employee health and safety, conduct health assessments, and provide medical assistance on-site.

Our Mentors

Backed up with the team of highly qualified, experienced and dedicated faculties, St. Wilfred's College of Pharmacy always seek to develop in each student the ability and passion to work wisely, creatively, and effectively for the betterment of humankind.

Our Quality Policy

We are molding our student to face the ever growing challenges of the academia, industry and society. Quality Policy focuses on:

Accomplishment of innovative teaching learning process for the students to meet the advancement of current health care profession by incorporating standard practices, Practical training and ethical codes.

Establishment of excellent infrastructure, computational & smart facilities to offer need based training to meet the standard pharmacy practices.

To provide the scope for continuous quality improvement for raising lifelong learners to fulfill the upcoming needs and challenges in pharmacy profession and retaining dedicated, outstanding and diverse faculty and staff.
